

Creation Care

Global Approach

30th September 2019

Developing to Destruction

Economic success is having destructive consequences

Planetary Boundaries

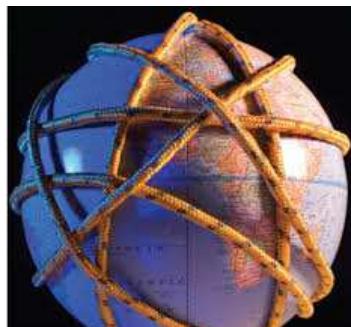

Environmental stress at breaking point non returnable

IPCC Report (Intergovernmental Panel on Climate Change)

- The IPCC are the authoritative gathering of the world's climate scientists.

Report: <https://www.ipcc.ch/srocc/download-report/>

- **Summary:**
 - oceans are rising and getting warmer
 - ice is melting, glaciers are shrinking, and permafrost is melting:
 - worse floods and cyclones
 - less fish to eat
 - damage to ecosystems in the oceans, mountains and the Arctic
 - less water from glaciers for drinking, irrigation and hydro electric power
 - roads and buildings on permafrost collapsing.
- Keeping a limit on global warming will help limit the damage for most of these things, but if we reach 2 degrees that's probably enough to kill all the world's coral.

The Challenge

- Ignorance
- Neglect
- Arrogance
- Greed

- Inform / Raise awareness
- Motivate: passive / penalty driven
- People Power
- Law

Plus

- Poor theology (Worldview)
 - Dichotomy:
 - Evangelism
 - Socio-ecological responsibility
 - Self serving theology
 - Lifestyles
 - Lack of political action
- Good theology teaching
- Integral Mission
- Lifestyle changes
- Engagement opportunities

Responses

Note: People with the highest exposure and vulnerability are often those with lowest capacity to respond

- Education and climate literacy
 - Social learning
- Capacity building to make good policy and implementation
- Protection
- Restoration
- Good management (ecosystem-based) of renewable resources
- Integrated fresh water management
- High risk areas for rising sea levels – require action
- Carbon emissions reduction
- Address pollution, waste management, recycling processes
- Resilience will require trade offs, compromise, and cooperation

Suggested Actions

Engage with the SDGs

- Governments
- Donors
- Business
- Civil Societies
- Aid Organisations
- Mission Organisations
- Training Institutes
- Denominations and Local Churches
- Networks
- Alliances
- Communities
- Churches
- Families
- Individuals

- Lobby
- Prompt to be a part of funding grants
- Demand production info – conform to sustainable practice
- All public figures to require their stance on care of environment
- Sustainable Commitments integrated into all levels of activities
- All staff and partners trained and part of staff review
- Integrated into College curriculum, compulsory for all
- Denominations heads pledge to train constituents
- All networks and alliances committee to participating
- Communities to rewarded when they become green zones
- Churches to lead the way

Substantial assistance to countries that need help to implement

Approach for the Church

- An **essential** role of the local church is to help frame and inform **every area of our lives with the Gospel**
- Equipping believers with a thorough understanding of poverty, justice, reconciliation and creation care (core characteristics of God)
- Facilitation of dialogue around current issues of injustice, poverty, wholeness, within their own community, nation and globally
- Practice: Examples, Partnerships, Cooperation, Mentoring
- Encouraging engagement in social action the local church plays an essential role in the work of Gospel.
- Bring theology and practice together
 - Dealing with the tough questions
- Support in helping to tell their story, to witness and share their faith in a meaningful and relevant way
- Understanding roles of actors in relief & development with regards local church and community mobilisation
